

## Next Three Year Stretch, Challenges and Innovations

---

The group considered this question: What is our next three year stretch, challenge or innovation as leaders for authentic and reliable direction of our Workgroups and Steering Committee? These themes and some examples emerged:

1. Establish a bigger role in influencing funding designs/continuum
2. Generate strategies to deal with systemic change; what would it look like?
3. Address our governance practices to promote long-term sustainability. Support the transitioning of leadership, build the base of emerging leaders and address issues of diversity.

Note: As you review these strategies consider how systems building, financing and data support their implementation.

# Next Three Year Stretch, Challenges and Innovations

---

The group considered this question: What is our next three year stretch, challenge or innovation as leaders for authentic and reliable direction of our Workgroups and Steering Committee? These themes and some examples emerged:

4. Realign the workgroups to generate more sustainable efforts given fewer staff resources. For example, choose 2-4 items in next year and develop the needed structure to energize the work and produce more successful outcomes and system level changes.

Note: As you review these strategies consider how systems building, financing and data support their implementation.
