Notes:

N/A: Data not available.

Changes in the method of estimating substate areas caused breaks in the continuity of the data series. These breaks occured during the following periods: December 1999 to January 2000; and December 1993 to January 1994. Because of the changes in methodology, data for the period preceding each break are not comparable to data Estimates for New York State and New York City are based on regression models from the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. Other sub-state estimates are prepared by the Local Area Unemployment Statistics (LAUS) Unit of the Regional totals may not equal sum of counties due to rounding.

Rates are per 100 persons 16 years of age and older within the labor force.

* Rates are not stable when the number is less than 20.
